*March 26, 2003

Pacific Gas and Electric Company, San Diego Gas & Electric Company, Southern California Edison Company, and Southern California Gas Company are sponsoring a public workshop to obtain public comment on the draft final report for the PY2001 Low Income Energy Efficiency (LIEE) Program Evaluation. The evaluation entailed both a process and impact evaluation of the PY2001 program with emphasis on the Rapid Deployment efforts and measures. The draft final evaluation report includes two parts: the

process evaluation report and the impact evaluation report and will be sent electronically to parties on the service list for R.01-08-027 and A.00-05-002, the newly created service list for the consolidated Annual Earnings Assessment Proceeding (AEAP), no later than March 19, 2003. The workshop presentation will highlight key results addressed in both parts of the draft final report, but since the preliminary study findings and the basic study approaches were discussed in detail at the public workshop held in August 2002, this workshop will be dedicated, primarily, to soliciting and obtaining public comment on the information contained in the written reports. Interested parties can offer comments at the March 26, 2003 workshop as well as submit written comments on the report through March 31, 2003 (send to Angela.Jones@sce.com).

**Summary:** On March 10, 2002, Jeffrey P. Gray, counsel for the California Solar Industries Association, met with Julie Fitch, advisor to Pres. Peevey, and Steven Weissman, advisor to Cmmr. Wood, in two separate meetings in San Francisco. Also present were Juliette Anthony of Sun Power, Kari Smith of Powerlight, and Susan Stephenson of The Next Generation. A copy (attached to the notice) of CalSEIA's reply comments on the Cmmr. Lynch's alternate was used during the meeting with Steven Weissman. Gray commended the Peevey/Kennedy alternate for recognizing that, absent an exemption from exit fees for distributed solar generation, the policy initiatives of the Legislature to advance for further development of clean, renewable solar generation will suffer a major setback. Gray also explained that exempting net metered generation from exit fees is fully consistent with AB 58 and other policies encouraging investment in solar generation. Smith described the many benefits customer solar generation provides to all ratepayers. Anthony explained that exempting all customer solar generation from exit fees would increase costs to other ratepayers by only a few cents a year. During the meeting with Steven Weissman, Gray also noted with respect to Cmmr. Lynch's alternate, that revisions were necessary to clearly and unambiguously exempt all customer solar generation from exit fees.

SBC California representatives indicated that Pac-West Telecomm, Inc.'s (Pac-West) claim regarding the amount of transport and tandem switching charges Pac-West would pay pursuant to the alternate is exaggerated; moreover, Pac-West has options to lease facilities that would result in lower costs. SBC California representatives also indicated that under the alternate, Pac-West will receive tandem rates for terminating traffic that are higher than the end-office rates Pac-West received under previous contracts. Finally, SBC California representatives stated that it offers services to ISPs.
